2002

Preface.

In this Synopsis I have enumerated the genera and species of cultivated Orchids, that are not included in Professor Lindley's 'Folia Orchidacea.' I have given a résumé of the characters of each genus; a reference to the definition of each species; and to illustrative figures; — so far only as these data are to be collected from works existing in my own library.

R. H. G.

October, 1874.

Explanation of Reference Letters.

N.B. — Those in black ink refer to letter-press; those in red or coloured ink to figures. The letter d. signifies that a definition, or description of the species is given.
